## Turkey Preparation & Roasting Instructions

The traditional method for roasting a turkey, unstuffed, is as follows:

Place on rack in roasting pan, brush with oil, sprinkle with salt and pepper and herbs, and roast at 325 degrees. Use a generous amount of herbs as they will help to flavor the gravy drippings. Do not cover, but start basting after some juices have accumulated in the pan.

Remember that all ovens are different; therefore it is important to check for doneness with an instant read thermometer. The turkey will be safely done when the internal temp. of the thickest part of the thigh reaches 175 degrees or breast 165 degrees.

The time for roasting, unstuffed, is 10 min. per pound.

Add 2-5 min. per pound for a stuffed bird and also check the center of the stuffing for 165 degrees.

**Stuffing can be made ahead, refrigerated, and put in bird just before roasting.**

**(It has been our experience that the Stonewood Farm turkeys are done in less time than recommended).**
